Paul Guillemin

AI / Data / Business Process Transformation | Engineering-Management Dual Degree
paulguillemin.com | contact@paulguillemin.com

Engineering and management dual-degree student at Mines Saint-Etienne and emlyon business school. Hands-on experience in automation, applied AI and data reliability, supporting technical and business teams.

PROFESSIONAL EXPERIENCE

Intern – Stellantis, France **Apr 2025 – Aug 2025**

- Designed and deployed an internal web application to automate vehicle-weight benchmark analysis and improve the reliability of new-model integration into a competitive database.
- Developed an AI semantic-classification model across 40,000+ annotated descriptions and 351 categories, reaching **93.7% accuracy**.
- Automated component classification between technical repositories using 35,000+ existing mappings, improving data consistency, traceability and quality.

Intern – Conseil Departemental des Hauts-de-Seine, France **Jan 2024**

- Assessed automation solutions for virtual-machine deployment, considering infrastructure, cybersecurity and traceability requirements.
- Produced a structured benchmark to support decision-making in a systems and network-administration environment.

Illu-Mines – Science Outreach Association, Saint-Etienne, France **2023 – 2024**

- Organized scientific conferences and science-outreach events; coordinated teams, partner relationships and communication materials.

EDUCATION AND COURSEWORK

emlyon business school, Lyon, France **2025 – 2027**
Grande Ecole Programme, engineering and management dual degree.
Relevant coursework: Corporate Finance, Corporate Strategy, Strategic Change and Innovation Management, Consulting.

Ecole Nationale Superieure des Mines de Saint-Etienne, France **2023 – 2026**
Engineering degree, specialization in microelectronics and computer science.
Coursework: computer science, electronics, microelectronics, data and AI, applied mathematics, industrial systems and complex technical environments.

Institution Sainte-Marie Antony, France **2021 – 2023**
Preparatory classes for French Grandes Ecoles, PCSI / PSI: mathematics, physics, chemistry and engineering science.

AWARDS AND PROJECTS

- **2nd national prize in France – EY AI & Data Challenge (2026):** optimized drinking-water supply through environmental-data analysis and structured recommendations.
- **3rd national prize in France – Rotary Professional Ethics Award (2025):** explored accountability and ethical responsibility when AI systems make errors.
- **1st prize – French Engineering Science Olympiad, Versailles Academy (2021):** designed an automated disinfection system for French health-insurance cards.
- **TIPE engineering project:** studied a controlled inductive-charging system for electric vehicles.

SKILLS

AI & data: Python, SQL, data analysis, KPIs, semantic classification, automation, applied AI, RAG, LLMs.
Transformation & business: process analysis, data consolidation, decision support, information reliability, structured reporting.
Collaboration: needs analysis, stakeholder communication, presentation, technical popularization and cross-functional coordination.

LANGUAGES AND CERTIFICATIONS

Languages: French native | English C1 | Spanish | German
Certifications: Financial Markets – Yale University | Negotiation – ESSEC Business School | Inside LVMH
